ABOUT US

Founded in 2017, Karich Sazan Honar Saman Co. (Karich) advances a clear mission: minimal design, precise engineering, and the specialized manufacturing of premium sanitary and ceramic building products. Our first integrated washbasin—officially registered with Iran’s Intellectual Property Center—set the tone for a fully controlled, end-to-end portfolio in which research, design, prototyping, mold-making, glazing, firing, and quality control are handled in-house.

Today, Karich supports residential and commercial projects alike, from private homes to hospitality, retail, and office developments. Our products are organized into four families—Bath, Kitchen, Tables, Decorative—so architects, interior designers, and project owners can specify coherent solutions across spaces. We work with engineered ceramic slabs and refined surface finishes that deliver tight tolerances, hygienic performance, and long-term durability against everyday wear.

A vertically integrated design-to-manufacture process safeguards consistency at every step: CAD/CAM development, precision cutting, advanced firing cycles, and meticulous finishing. This control allows us to offer practical customization in sizes and configurations, provide technical drawings and installation guides, and coordinate logistics to meet project timelines. “Made in Iran” is not merely a label; it reflects our commitment to local craftsmanship at international standards and to building reliable supply for domestic and export markets.

Every Karich product ships with an 18-month warranty—an explicit assurance of build quality, material integrity, and careful workmanship. Our after-sales team provides responsive support to ensure dependable performance over time. Karich, Designed to Enrich: products that elevate everyday environments through clarity of form, functional rigor, and lasting beauty.

Hygienic, Easy-Clean Surface

Hygienic, Easy-Clean Surface Made from dense, non-porous ceramic, Karich surfaces resist moisture ingress and everyday staining, so residue doesn't bond and odors don't linger. A quick wipe with neutral cleaners restores a crisp finish, helping bathrooms and kitchens stay visibly clean with less

Engineered Durability

Karich products are built for real-world use, with bodies and finishes engineered to withstand routine abrasion, household detergents, and thermal variation within typical service conditions. Edges retain their definition, colors remain stable, and surfaces keep their integrity through years of daily touch, impact, and cleaning cycles.

Precision Build with End-to-End Control

By managing the full chain in-house—from CAD/CAM and mold-making to glazing, controlled firing, and inspection—we achieve millimeter-level tolerances, aligned veins, and consistent finishes across batches. This precision translates to cleaner fits on site, faster, more predictable installation, and a unified aesthetic across connected elements.

18 Month Warranty

Every Karich product is covered by an 18-month warranty as a clear assurance of build quality and material reliability. Local manufacturing supports predictable lead times and responsive after-sales service, with technical guidance for installation and care so projects perform dependably long after handover.

A modern bathroom interior featuring a long, white vanity with three rectangular, dark-colored sinks. Each sink has a chrome faucet and the brand name 'karich' is visible on the front. Above the vanity is a large, rectangular mirror with a thin, illuminated frame. The walls are covered in large, dark, square tiles. The floor is also made of large, dark, square tiles. A potted plant is visible on the right side of the vanity. The ceiling has recessed lighting.

BATHROOM

W Series

Well-crafted Calm For
Wet Zones

W Series inaugurates Karich's wall-hung line, defined by a tall front fascia that gives the piece a sleeker, more architectural stance while keeping the floor clear. The unit fixes to the wall on a reinforced hang-rail with locking carriers for a rigid, level install. Configure it with a soft-close drawer or add a coordinated cabinet for extra storage. Supplied in standard modules or built to your requested dimensions, Series W adapts cleanly to residential and light-commercial projects that want a crisp look with practical capacity.

V Series

Vision to V alue

V Serie is a minimalist wall-hung vanity with a dual-piece concept: the basin and the monochrome look. Configure it as a vessel, with the bowl standing proud above the deck as a separate element, or as a co-planar, flush execution for a continuous surface. Hidden wall anchors deliver a rigid, tidy mount. Supplied in standard modules or fabricated to your exact measurements to align with project layouts and palettes. Engineered from high-density porcelain slab with a sealed, non-porous glaze, V Serie resists moisture, stains, and UV fade and wipes back to a hygienic sheen. Precision-cut edges, controlled fillets, and a tuned bowl slope minimize splash and keep flow quiet. A slim services cavity conceals waste and supply lines while leaving the floor clear for easy cleaning. Compatible with wall-mount or deck-mount mixers (single-hole or wall-set), it ships with concealed steel brackets and a complete fixing kit.

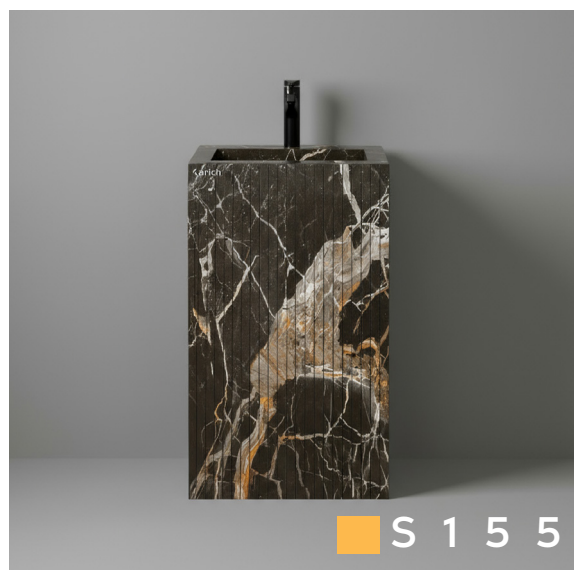

S Series

Seamless **S**urfaces,
Sustainable **S**trength

S Serie is a minimalist wall-hung vanity with a dual-piece concept: the basin and the monochrome look. Configure it as a vessel, with the bowl standing proud above the deck as a separate element, or as a co-planar, flush execution for a continuous surface. Hidden wall anchors deliver a rigid, tidy mount. Supplied in standard modules or fabricated to your exact measurements to align with project layouts and palettes. Designed for precise project integration, S Serie is available in standard widths of 60, 80, 100, and 120 cm with 45 or 50 cm projection, plus made-to-measure lengths for tight niches. Vessel and flush executions are factory-prepared with clean cut-outs, optional overflow, and 0- or 1-tap-hole configurations. Crisp square edges with micro-chamfers read sharp without being fragile, while the bowl geometry contains splash and keeps deck edges dry.

P Series

Precision, **P**urity, **P**resence

P Series is a budget-friendly, wall-hung vanity line made from moisturesafe PVC for everyday, low-maintenance use. The lightweight, swell-resistant carcass stays tidy in humid washrooms and wipes clean in seconds. Its straightforward geometry suits public facilities such as offices, schools, clinics, gyms, malls, and transit hubs, where durability and fast turnaround matter. Delivered in standard modules or made to your requested dimensions, Series P brings reliable function and smart pricing to high-traffic restrooms. Built for fast, predictable rollouts, P Series ships flat-packed with pre-drilled carcasses, concealed steel wall brackets, and a printable drilling template. Closed-cell PVC panels with sealed edges resist swelling, edge breakdown, and common cleaning agents; the low-gloss finish wipes clean in seconds and hides fingerprints. Built for fast, predictable rollouts, P Series ships flat-packed with pre-drilled carcasses, panels with sealed edges resist swelling, edge breakdown, and common cleaning.

K Series

Known quality, **K**een design

K Series features a countertop vessel set independently on the vanity deck, separate from the body. The wall-hung chassis fixes to concealed carriers for a rigid, level mount and keeps floors open for easy cleaning. Storage is flexible: specify drawers, a cupboard, or a mixed layout, with tidy routing for tap and waste. The basin's color and pattern can be chosen independently from the cabinet finish to create two-tone statements or calm monochrome sets. Delivered in standard modules or fabricated to your exact dimensions, Series K suits compact bathrooms and design-led projects seeking a refined, customizable presence. Built for everyday ergonomics and clean detailing, Series K pairs a non-porous porcelain vessel with a moisture-safe, wall-hung chassis and a scratch-resistant deck. Specify slim 12 mm or monolithic 20 mm tops with factory-cut 0/1 tap-hole options, or keep the deck clean for wall-set mixers; bowl profiles include round, oval, square, and soft-rectangular in satin white, warm greige, or charcoal.

F Series

Fine-tuned Minimalism For
Modern Spaces

Series F is a slim, floating shelf built to host a countertop basin. It has no drawers and no cabinet; the basin is chosen separately by the buyer and simply rests on the flat deck. The wall-mounted layout keeps floors clear and the silhouette light, pairing a clean look with economy pricing for compact, style-led bathrooms. Engineered for rigidity despite its airy silhouette, Series F uses a concealed steel carrier with an anti-sag spine rated for a vessel basin plus 40 kg live load. The non-porous deck comes in 12 or 20 mm profiles with sealed edges and a low-gloss finish that wipes clean fast. Factory options include centered or offset basin placement, 0/1 tap-hole on deck, a rear services slot for waste and supply routing, and an optional 20 mm upstand to protect the wall. A pre-drilled template, fixings, and color-matched sealant enable a quick, level install on masonry or reinforced stud walls; micro-chamfered edges keep the line crisp without feeling fragile.

B Series

Boldly minimal,
Beautifully engineered

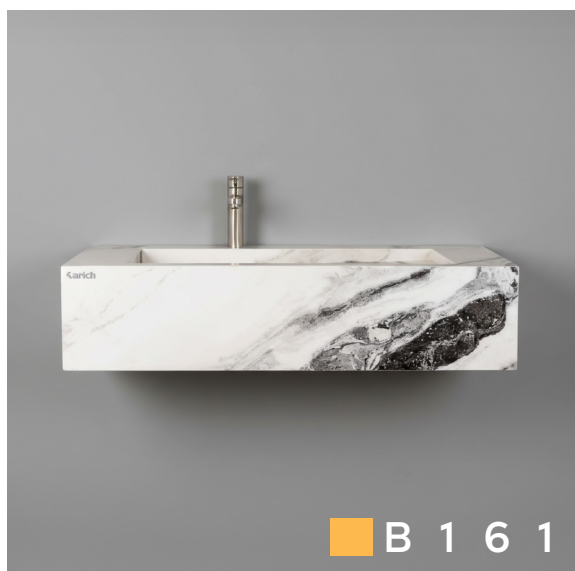

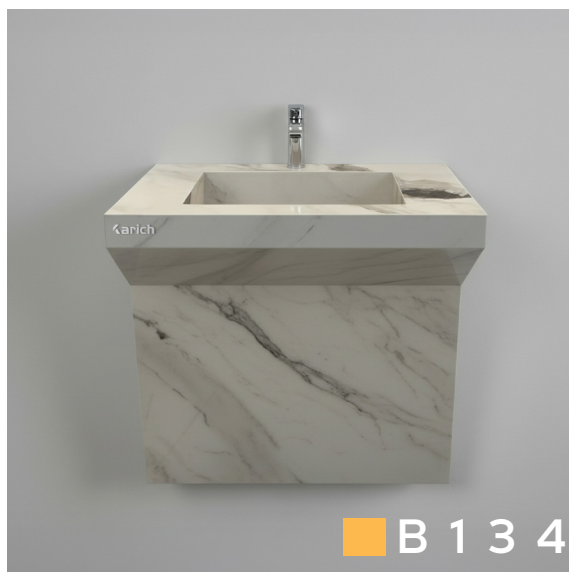

B Series is our most budget-smart, clean-lined wall-hung washbasin for high-volume use. A short front apron keeps the profile compact, while the legless, drawer-free form leaves the floor open for quick cleaning. Dense, closed-pore ceramic shrugs off stains and everyday cleaners, and a concealed bracket speeds secure installation with tidy sightlines. Available in standard sizes or made to your requested dimensions, it fits tight layouts or consistent project modules, cutting waste and installation time.

B 1 6 5

A modern kitchen interior featuring a central island with a white marble countertop and a light wood base. Three wooden stools are tucked under the island. The background shows a wall of light wood cabinets, two large glass pendant lights, and a large window with a black frame offering a view of a city. On the countertop, there is a small potted plant and a bowl of green fruit.

KITCHEN

■ **Karich Kitchen** turns ceramic from a technical choice into an everyday delight, with non-porous surfaces that resist steam, moisture, and spills and wipe back to a lasting sheen. The collection functions as a coordinated system: **cabinets**, **worktops**, and **sinks** align in dimensions, colors, and hardware for smooth installation and a cohesive finish. Standard modules sit alongside made-to-measure options to ensure a perfect fit and easier day-to-day care.

TABLE

■ **Ceramic coffee and side tables** offer ring-proof, wipe-clean surfaces with a calm, refined look. Closed-pore glazes resist spills and light abrasion; edge options include fine chamfer or slim bullnose. Bases come as slim pedestals, open frames, or monolithic blocks in powder-coated steel, timber, or matching ceramic.

■ **Decorative consoles** pair monolithic porcelain stoneware and concealed hardware for a minimalist, durable living-room presence. Configurable wall-mounted or freestanding modules offer varied lengths, drawers, and doors with soft-close, push-to-open action, plus organizers and cable management.

■ **Ceramic office desks** provide a color-stable, ink- and coffee-resistant work surface that stays pristine under daily use. A reinforced steel or timber frame carries the load, while a rear cable spine with flip-up lids and passthrough grommets keeps wiring invisible. Available as single desks, L-returns, and benching systems with matched meeting tables for a coherent workspace.

■ **Ceramic reception desks** establish a calm, architectural focal point the moment guests enter. A color-true ceramic shell shrugs off scuffs, coffee rings, trolley impacts, and rigorous cleaning in high-traffic lobbies. The modular chassis supports straight, L, or curved layouts; mitred edges and shadow-reveal joints keep profiles sharp.

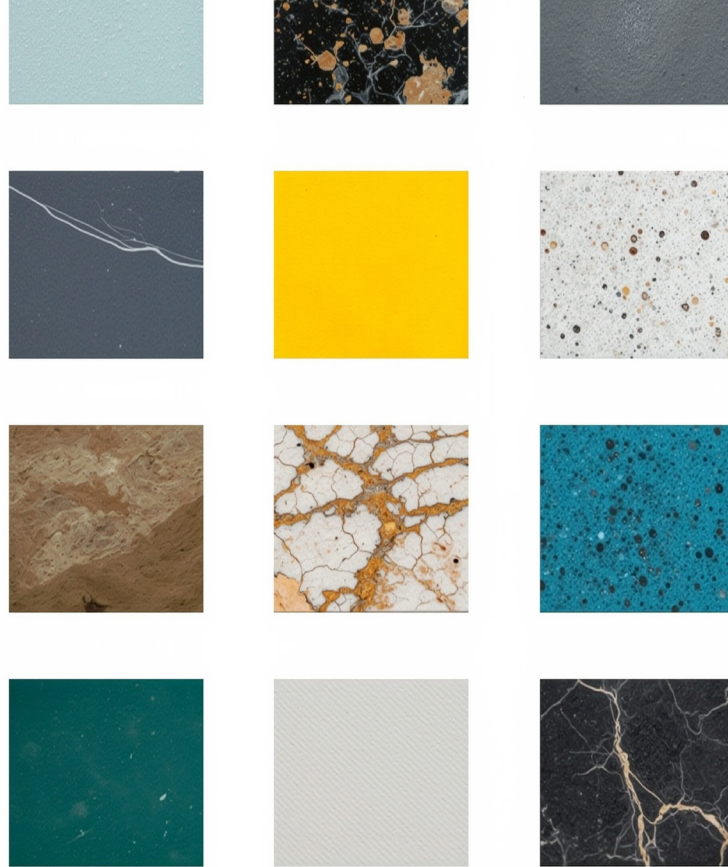

DECORATIVE

Built to Karich standards, our decorative pieces use dense porcelain stoneware and durable glazes to create a cohesive signature alongside our vanities. From **linear and cubic vases** to **flower boxes** and accessories like **tissue holders, trays** and **lidded containers**, each piece can be specified in a wide range of colors and textures to match minimalist or luxury interiors.
